

THANK-YOU

WALLET

Introduction

THANK-YOU Wallet is a mobile payment platform designed to address the financial challenges faced by communities with limited access to ATMs and banking services, particularly in rural areas like Namibia's Omaheke region. Our solution allows users to send funds directly to specific stores or service stations for beneficiaries, eliminating the need for cash withdrawals and reliance on ATMs. It is designed to empower the unbanked and underbanked by offering a secure, seamless, and direct way to access goods and services without the traditional barriers posed by cash-based systems.

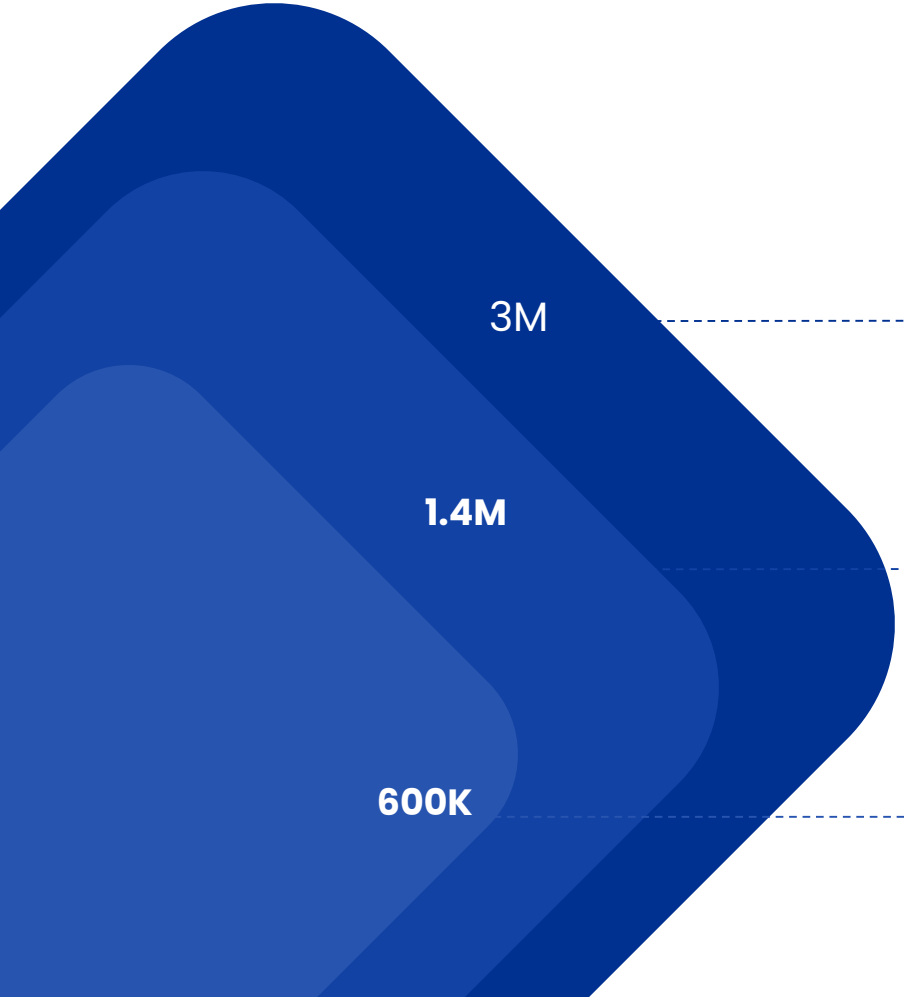

Problem Statement

- Limited access to ATMs in rural areas creates cash dependency.
- Limited Access to funds
- Unreliable small POS machine

Solution

THANK-YOU Wallet enables users to send funds directly to stores or service stations, providing a cashless, convenient solution that eliminates ATM and cash dependency.

Market Opportunity

TAM

Total Addressable Market represents the full revenue potential in Namibia's digital payment sector, targeting underbanked and rural communities.

SAM

Serviceable Addressable Market is the segment of Namibia's payment market that THANK-YOU Wallet can realistically target, focusing on rural areas.

SOM

Serviceable Obtainable Market represents the share of Namibia's payment market that THANK-YOU Wallet can realistically capture, considering competition and local partnerships.

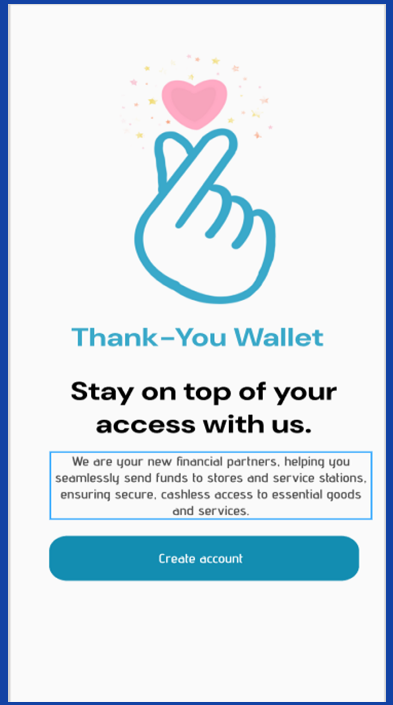

- **Next Steps:** Finalize prototype development, secure partnerships with key stores and service stations, and begin pilot testing.
- **Growth Plan:** Expand regionally and build a user base across other underserved areas in Namibia.
