TRANSFORMING WATER QUALITY MANAGEMENT WITH IOT

JOSEFINA GEBHARD

THE CHALLENGE OF CONSISTENT WATER QUALITY

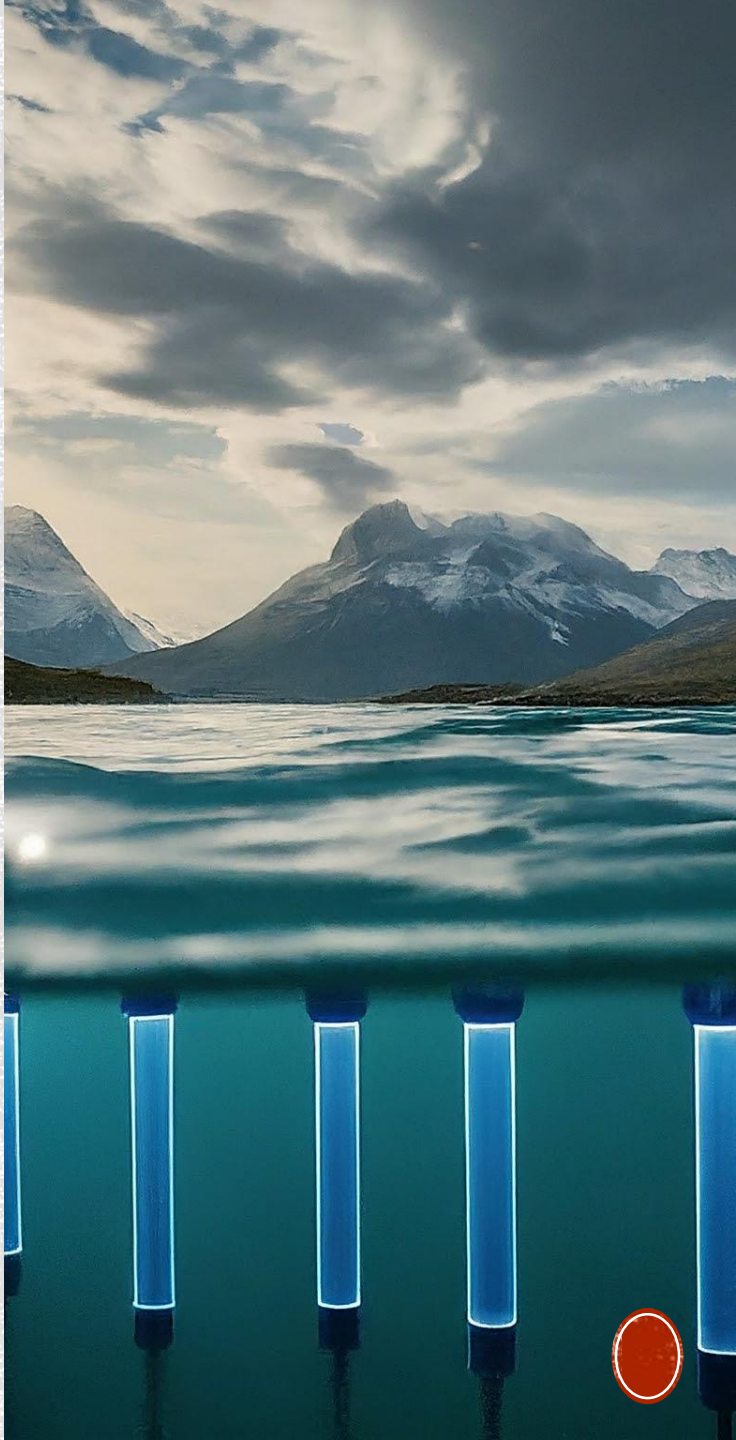

- ✓ Ensuring consistent water quality throughout vast distribution networks is a significant challenge for water utilities.
- ✓ Traditional methods rely on manual sampling, which can be time-consuming and prone to human error.
- ✓ Contamination risks
- ✓ Inefficient resource use
- ✓ Disruptions in water supply

OUR SOLUTION: IOT BASED WATER QUALITY MONITORING SYSTEM

- ✓ Provides real-time data on critical water parameters
- ✓ Utilizes strategically placed sensors to continuously monitor relevant water parameters based on client's specific needs

▪*Real-time data allows for:*

- ✓ Early detection of water quality deviations
- ✓ Prompt response to potential issues
- ✓ Proactive maintenance measure

VALUE PROPOSITION

Improved Efficiency

Enhance brand reputation

Improved system reliability

Data driven Decision making

Improve Public Health

IMPLEMENTATION & SUPPORT

- Seamless Implementation and Ongoing Support

✓ Collaborative approach

✓ We provide sensor installation and system configuration

✓ Our team offers comprehensive training for personnel on system operation.

✓ Ongoing technical assistance

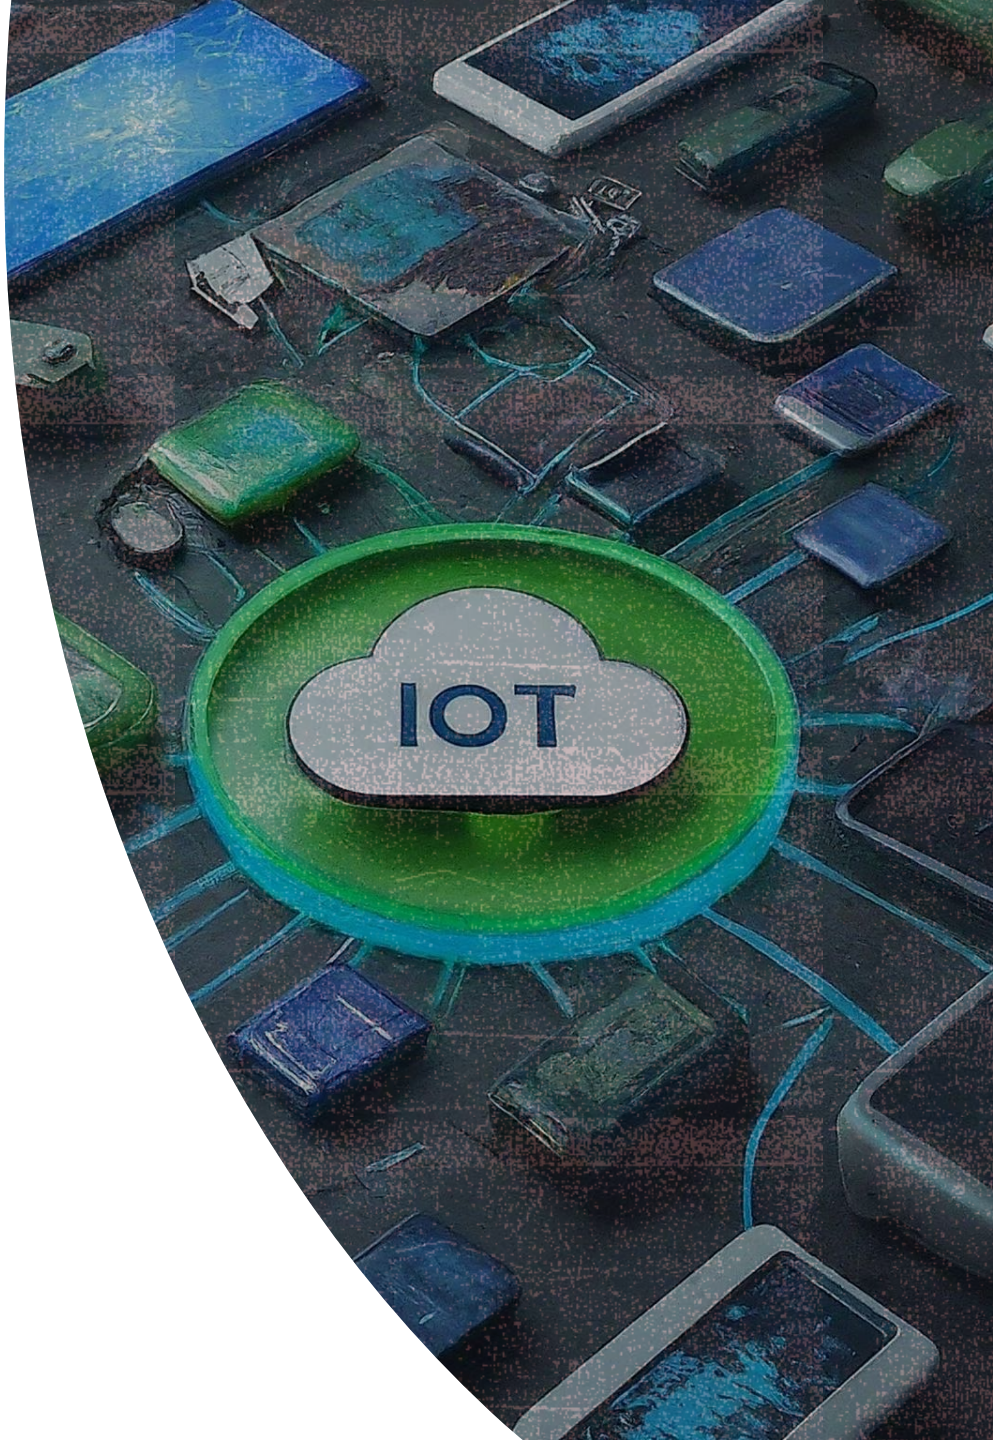

✓ Remote troubleshooting and on-site support

✓ Regular system updates

FUTURE PLANS

- ✓ Expand Product offering
- ✓ Enhance data analytics capabilities.
- ✓ Customization and integration services
- ✓ Compliance and Regulatory support
- ✓ Partnership and Collaboration
- ✓ International Expansion

THANK YOU FOR YOUR TIME!
