# OFFICE OF THE PRIME MINISTER

## Department of Public Service e-Governance Management (DPSeGM)

# Namibia Government Digitalization Journey

**"Building Resilience: 'Adapt or Die' in the Era of Digital Transformation and Artificial Intelligence (AI)"**

**PRESENTER: Johan van Wyk, Director, QASSDC**

**10 SEPTEMBER 2024**

# E-Government Namibia – Strategic Directives and alignment

- **Vision 2030:** A knowledge-based Economy and a Technology Driven Nation
- **National Development Plans (NDP5 / 6):** Namibia should have universal access to information, affordable communication and technology infrastructure and services
- **Information Technology Policy for the Namibian Public Service, revised 2017:** Management of IT Services in government to deliver more customer-focused and effective public services and to support internal operations
- **E-Gov Policy for the Public Service of Namibia**
- **E-Government Strategic Action Plan for the Public Service**
- **Harambee Prosperity Plan II (HPPII)**: Accelerate the roll-out of key e-governance services
- **OPM Strategic Plan**

# Department Public Service e-Government Management (DPSEGM)

## DEPARTMENT'S MANDATE

**1.** Public Service e-Government Management
(IT Policy for the Public Service of Namibia 1993 revised 2003 and 2017)

**2.** Coordinate and assist with the development and implement of e-Government projects

*(e-Governance Policy for the Public Service, 2005)*

*(e-Government Action Plan 2014-2018)*

**3.** Internet Services provision to OMAs and RCs

# Start with the End in Mind

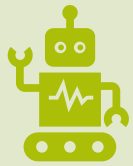

**Digital Identity:**

- Empower Namibians with a unique digital ID which will form the core requirement to access digital public services.
- An illustration, created with ChatGTP, representing **Namibia's Digitalization journey with a focus on a citizen-centric vision.**
- Image shows a person comfortably interacting with online services at home, blending traditional Namibian elements with modern technology, and symbolizing the Namibia's path toward a digital future.

# Adapting to digital transformation and artificial intelligence (AI)

Adapting to Digital Transformation and Artificial Intelligence (AI) is crucial for Namibia for several reasons.

These include improving governance, enhancing economic development, and addressing socio-economic challenges.

# ADAPTING TO DIGITAL TRANSFORMATION AND AI IS CRUCIAL FOR NAMIBIA FOR SEVERAL KEY REASONS:

**Enhanced Efficiency:** Digital tools streamline government services, reduce bureaucracy, and improve service delivery.

**Economic Growth:** Innovation driven by AI and digital technologies can attract investment, create jobs, and boost competitiveness.

**Infrastructure Improvement:** Digital solutions extend services to remote areas and optimize data management.

**Governance and Transparency:** Digital systems increase transparency, reduce corruption, and enhance accountability

**Education and Skills Development:** Technology expands learning opportunities and prepares a skilled workforce.

**Global Competitiveness:** Embracing technology helps Namibia stay competitive and manage global challenges.

**Social Inclusivity:** Digital platforms provide equitable access to essential services and empower citizens.

# Digitalization Journey

Internet and Email introduced in Government
Government Internet gateway launched (ISP)

eGovernment Policy Launched
Government Intranet Portal (eService) goes online

eGSAP launched

Continued Development of Online Services
Improvement on Back Office System
Implemented POPs in the regions for decentralized access to the GRN services

# E-Government Framework

# e-Government Strategic Action Plan - STRATEGIC FRAMEWORK 2018

| Element of the Strategic Architecture | **5** Strategic Thrust Areas | **15** Strategies implemented through 15 Programmes | **119** Projects constituting the 15 programmes |
|---|---|---|---|
| Monitoring and Evaluation Parameters | Goals associated with the different Thrust Areas | Programme Measurement Indicators associated with every programme | Project Measurement Indicators associated with every project |

# Digital Government: Moving Forward with Digital Transformation

## Analog Government

- Closed operations and internal focus
- Analog procedures
- Government as a provider

## e-Government

- User-centered approach but supply driven
- One-way communications and service delivery
- ICT-enabled procedures, but often analog in design
- Sliced ICT development and acquisition
- Greater transparency
- Government as a provider

## Digital Government

- Procedures that are digital by design
- User-driven public services
- Government as a Platform (GaaP)
- Open by default (co-creation)
- Data-driven public sector
- Proactive administration

## GovTech

- Citizen-centric public services that are universally accessible
- Whole of Government approach to digital transformation
- Simple, efficient and transparent government systems

# DIGITAL ROADMAP
# TRANSFORMATION FRAMEWORK

## Digital Transformation Framework

**VISION**

**Digital First Services for All**

| Digital identity | Data interoperability | Digital service transformations | AI in public sector | Start-up ecosystems |
|---|---|---|---|---|

Governance & Leadership / Managing the delivery

# "Digital First Services for All"

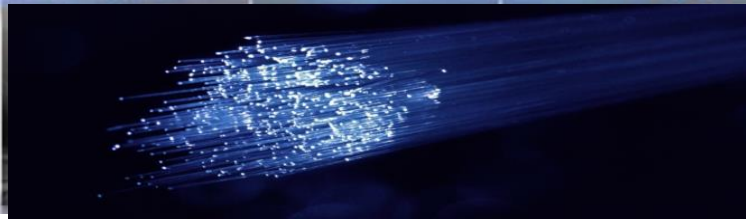

- Office of the Prime Minister, supported by the Estonian Centre for International Development (ESTDEV) and an Estonian advisory firm Digital Nation finalized new Digital Government Strategic Roadmap aimed at setting a vision

**"Digital First Services for All"**

**Practical roadmap for three years to advance Namibia's e-government efforts 2024 – 2026**

- Detailed plan for digitalization,
- Focus on transforming digital governance and technology into fundamental components of public service delivery in Namibia.

# VISION:
# "Digital First Services for All"

ThePhoto by PhotoAuthor is licensed under CCYYSA.

## VISION OF THE DIGITAL GOVERNMENT STRATEGIC ROADMAP

## DIGITAL FIRST SERVICES FOR ALL

**Inclusive** Available and accessible digital services for everyone.

**Citizen-centric** Putting the needs and preferences of the citizens first.

**Integrated** Seamless coordination between OMAs to provide user-centric services, remove “SILO’s”.

**Trustworthy & secure** Safeguarding citizens' data, privacy and confidence in digital government and services.

**Transformative & innovative** Leveraging technologies and progressive strategies to enhance digital services delivery.

# "Digital First Services for All"

- The roadmap's vision signifies a **transition from traditional methods** of public service provision to a priority on **developing and delivering digital services**.

- This approach emphasizes **digital inclusivity and a citizen-centered framework,** ensuring that all citizens can benefit of digitalization advancements.

# "Digital First Services for All"

- Strategic priority actions essential for building a robust digital government in Namibia.
  - Initiation and distribution of unique eIDs for all individuals,
  - Expansion of the NAM-X unified data exchange platform,
  - Creation National Government Data Centre and Cloud,
  - Develop and implement a Service Portal and the introduction of the first digitally transformed public services.

# "Digital First Services for All"

This roadmap is not merely about adopting technology;

"This strategic roadmap is an essential instrument for tackling the important work ahead.

It's a blend of ambition and practicality, underlining the urgency of advancing towards a modern digital government."

it is an impact-oriented, practical framework, designed to unite the efforts of all stakeholders in Namibia's digital government, and to foster an innovation culture that prioritizes the needs of citizens."

# ROADMAP PILLARS:

**1) Governance & leadership (SO2: Ensure effective leadership and good governance - P1.2)**

Policy package and reviews

Institutional framework review

Digital leadership training programme + digital skills programme

**2) Digital identity & digital signatures**

Drafting of legal base package

UIN issuance for all residents, eID set up and eID issuing and integrations

**3) Registers & Interoperability**

Interoperability framework finalized, Scaling NAMX adoption, Service catalogue

Gov-wide IT Architecture and requirements,

Data Governance Basis Framework

# ROADMAP PILLARS:

**4) Digital Public Services & Administrations**

**Roadmap, Transformation Programme for TOP 10 Services**

**National Service Portal Plan(OSS)**, Portal further development + services on boarding

**5) Cybersecurity & Data protection**

NCIRT operations and further development,

**Cyber security standard**

Standard implementation + trainings (basic skills + specialists)

Data protection guidelines, Training of civil servants (DPOs, controllers and processors)

**6) Government infrastructure & platforms (SO4: Leverage E-Governance and ICT infrastructure- P3.1**

Government data centre + cloud plan, Cloud Policy

**National Data Centre,** (Public Sector ICT Infrastructure Consolidation), Government

# Objectives: Digital Government Strategic Roadmap

**Roadmap timeline is set for three years (2024-2026)**

- Keep the focus clear and objectives tangible in the fast-evolving digital transformation.
- Pave the review of the e-Governance Policy

1. Transforming TOP 10 priority public services.

2. Unnecessary paper bureaucracy eliminated in 50 services through NamX integrations.

3. Making digital services accessible for all by starting issuance of unique eID for everyone.

| Goal/milestone | 2024 | 2025 | 2026 |
|---|---|---|---|
| *Transformation of services* | Adoption of Service Standard | National Service Portal (OSS) live | TOP 10 priority services digitally transformed |
| *Integrated government* | Unnecessary paper bureaucracy eliminated in 10 services | Unnecessary paper bureaucracy eliminated in +15 more services | Unnecessary paper bureaucracy eliminated in +25 more services |
| *Digital services for all (milestones under revision)* | Adoption of legislative basis for Unique Identifier Number (UIN) issuance for all people | Starting issuance of UIN for everyone | eID launched with 10% of the population onboard |

# Key e-Governance Projects

**Harambee Prosperity Plan II (2021-2025)**

**Pillar:** Effective Governance

**Goal:** Improve Performance & Service Delivery

**Activity:** Accelerate the roll-out of key e-governance services at national and sub-national levels, including functional:

1. e-procurement
2. e-Learning
3. e-Health
4. e-Business
5. Social Protection, &
6. Civil Registration & Identification Systems

# Government Digitalization Objectives: "Adapt or Die"

## Objectives:

- Streamline services
- Embrace AI and advanced technologies
- Promote digital inclusion

## Efficiency and Service Delivery

- Automation: Streamline government processes and improve service delivery through digital tools and integrated platforms.
- E-Government Services: Provide online access to public services, enhancing convenience for citizens.

## Transparency and Accountability

- Open Data: Increase transparency by making government data accessible to the public.
- AI Monitoring: Use AI to track public spending and project outcomes, ensuring accountability.

# Government Digitalization Objectives: "Adapt or Die"

## Innovation and Economic Growth

- Support Tech Startups: Foster a tech-friendly environment to drive innovation and attract investment.
- Digital Economy: Develop policies to support and grow the digital economy.

## Infrastructure and Access

- Broadband Expansion: Improve internet access to support digital services across all areas.
- Cybersecurity: Strengthen measures to protect sensitive data.

## Skills and Literacy

- Training Programs: Enhance digital skills through training and educational integration.

## Resilience and Adaptability

- Agile Transformation: Implement agile practices and continuously update digital strategies to adapt to new technologies and challenges.

| MoWT | Fixed Assets Management System (FAMS) |
| | Maritime Information Management System (MIMS) |
| | Fleet Management Information System |

# The integration of AI into e-government services

- The integration of AI into e-government services can significantly enhance efficiency, reduce costs, and improve citizen satisfaction.

- Careful planning, ethical considerations, and ongoing evaluation are crucial to ensuring that AI-driven services are transparent, accountable, and equitable.

- Namibian Government should prioritize building AI systems that are citizen-centric, adaptive, and capable of evolving with changing needs.

- AI integration aligns with the broader goals of e-government by making public services more accessible, responsive, and efficient, ultimately fostering trust and engagement between citizens and their governments.

# Back Office Systems and Online Service Establishing

# Challenges

# (1) Back Office Systems and Online Service Establishing Challenges

| Challenge | Initiative / Remedial actions |
|---|---|
| Aged IT structures and Job Families that are not fit for purpose. | • Review of Job Families and remuneration in progress.<br>• Review of OPM: DPSeGM structure in progress. This will be followed by a review OMA IT structures. |
| Lack of skilled staff to build and deploy enterprise and client facing systems.<br>• Rapid IT advancements<br>• Complex technology | • Include professional certifications as a job requirement<br>• Develop training plans to upscale staff members inline with technology adopted.<br>• Improve remuneration to attract better quality candidates. |
| Inadequate funding for IT projects. | |
| Inadequate core infrastructure and no or inadequate back Office System to build e-service on.<br>• Silo based approach to establishing systems and services, which are business driven and not user driven;<br>• Cannot support electronic workflows;<br>• Data quality issues;<br>• Lack of integration with other systems. | • DPSeGM implementing core infrastructure to provide centralised hosting capabilities.<br>• National Data Centre investigation and budgeting in progresses.<br>• Digital Government Strategy being developed with the help of Estonia.<br>• Integration in progress between several entities using UXP. |

# (2) Back Office Systems and Online Service Establishing Challenges

| Challenge | Initiatives / Remedial Actions |
|---|---|
| High acquisition costs and escalating costs of IT solutions, support and maintenance. | |
| Important legislation still needs to be enacted and sectoral based legislation and policies adjusted for automation. | Finalise Data Protection, Cybersecurity; Civil Registration and Identification.<br>Review Evidence Acts and sectoral Acts and policies. |
| Cybersecurity protection challenges. | Operationalise Computer Emergency Response Teams (CERT) at national and sectoral levels. |
| No government payment gateway available to electronically pay for services. | BoN in the process to establish such payment gateway. |

Thank you
